

# HW 3 Grading Guidelines

Total Points: 10

You may not use any special tools to create your pages. Graders will view the source code and verify that you wrote the HTML and CSS directly.

1. **Hyperlinks – 2 points:** There are four (4) links. Students should implement the links by having four (4) of them all point to a single web page (page2.html) at your site. The single web page should be divided into four portions, each separated by a horizontal rule or white space. Each target anchor should be labelled accordingly.
2. **Layout – 3 points:** All components (text, font, borders) were properly placed.
3. **Font style, size and color – 2 points:** if there is no big difference from the image snapshots, you get 1 point for each component. The grader will load your page using the Firefox.
4. **CSS – 3 points:** Layout uses CSS to imitate page as closely as possible, including vertical scrolling and cropping of images. Various page components should be positioned proportionally with respect to each other. The page can be smaller or larger than the snapshots provided.

## IMPORTANT

- These grading guidelines are provided for your guidance. If any issue is not explicitly covered, you may discuss it on Piazza.
